

Catch Real Threats in Real Time

Eliminate costly false alarms with Dragonfruit's **Intrusion Detection** solution. Unlock accurate, real-time alerts, faster response, and measurable savings.

- **Lowest TCO.**
- **No CapEx. Just plug and go.**
- **Works with existing cameras.**

Runs on Dragonfruit's compact Basestation. No new servers, no bandwidth spikes, no GPU costs.

- ✓ Built to scale.
- ✓ Deploy in days.
- ✓ Real-time alerts & live oversight.

Choose the agents you need, when you need them.

Intrusion Alarm

Detects fence jumping, loitering, break-ins, burglary attempts, and wrong-way movements.

Duress Alarms

Trigger discreet emergency alerts through panic buttons or fobs, enabling immediate responses.

Video Verification

Instantly review video associated with every alert for fast, informed decision-making.

Talkdown

Issue live or automated audio deterrents through speaker systems.

911 Dispatch

Escalate serious events directly to emergency responders through integrated protocols.

Smarter intrusion detection delivers:

- **<5 seconds** to verified alert.
- **99.99% fewer false alarms**, reducing dispatch fatigue and costly fines.
- **Faster incident resolution** with a centralized dashboard and auto-tagged video events.

One platform. One dashboard. Smarter protection everywhere.
